

AP Alternative Portfolio AG

Investment objective

- Aims to achieve attractive risk-adjusted returns over the long term
- Aims to maintain low to moderate volatility of returns
- Aims to maintain low correlation to traditional asset classes

Product description

AP Alternative Portfolio AG is an investment company based in Zurich, Switzerland. With their investment, shareholders have access to a diversified portfolio of alternative investments, whereas no new private equity commitments are being made since mid 2013 and liquidity is being returned to shareholders.

Key benefits

- Historically focusing on private equity funds with hedge fund components seeking "value added" to a core, diversified private equity portfolio
- Since mid 2013 no new investments are being made and liquidity is being returned to shareholders

Investment advisor

Unified Global Alternatives (UGA), a key fund of funds provider since 1997 within UBS Asset Management, for illiquid alternative asset classes, including private equity and infrastructure.

AP Alternative Portfolio AG returns represent the profits or losses of the Fund net: (i) 0.80% annualised management fee, (ii) between 0% and 25.00% p.a. performance fee deducted from monthly profits, and (iii) expenses charged to the Fund in the month shown. The returns are based on calculations and information provided to the Fund's Investment Advisor, UBS Asset Management Switzerland AG, Unified Global Alternatives, by the Fund's Administrator, MUFU Alternative Fund Services (Cayman) Limited. In addition to being unaudited, the returns have not been reviewed by an independent third party. Therefore, the returns are subject to change without notification to the recipient based on, amongst other things, an annual audit of the Fund. Any returns presented may or may not be indicative of the returns of the share class, series, and/or fund offered to you. Your actual returns may be different and can be determined from the NAV statements sent by the fund's administrator. Due to the Product's extended track record, the above fund performance table is limited to prior monthly performance for the five preceding calendar years. The annualized returns shown in the above table cover the prior 12, 36, 60 months and since inception time periods. The full monthly track record is available upon request.

The chart below illustrates the performances of AP Alternative Portfolio AG and several indices. All indexed to 1,000 at the track record inception of 1 November 2000

Each index shown as if the index was at 1,000 as of 1 November 2000. The chart displayed above is intended solely for illustrative purposes. Neither the Fund nor any of the other indices shown are intended to track each other as they follow different investment strategies/programs, and different results over similar periods can be expected.

Note: data assumes re-investment of any dividend where applicable.

Product commentary

In January 2025, the AP Alternative Portfolio AG reported a monthly performance of negative -0.17% and an annualized launch-to-date performance of 5.41%. The Private Equity portfolio is in harvesting mode and reported a performance of -0.13% in January. In the portfolio BC European Capital IX was mainly responsible for the positive performance developments, while IPV Capital reported the largest negative performance impact in the portfolio in January. The PE portfolio was cash-flow positive with a net amount of USD 0.23 million, which was slightly below the last twelve-month average of USD 0.38 million. In January, the funds Accel Growth Fund II, NEA 14 and Francisco Partners III were responsible for the largest monthly distributions received by the AP Alternative Portfolio AG. No capital calls were received during the reporting period as most funds have finished their investment period.

Risk considerations

The Fund's investment program is speculative and entails substantial risks which may place your capital at risk. An investment in the Fund includes the risks inherent in an investment in securities, as well as specific risks associated with limited liquidity, the use of leverage, short sales, options, futures, derivative instruments, investments in non-U.S. securities and illiquid investments. The Fund invests largely in other unregulated hedge funds. Such a portfolio of hedge funds may increase an investor's volatility for potential losses or gains.

One or more of the funds, from time to time, may invest a substantial portion of the assets managed in an industry sector. As a result, the manager's investment portfolio (as well as the Fund's) may be subject to greater risk and volatility than if investments had been made in the securities of a broader range of issues. There can be no assurances that a fund's strategy (hedging or otherwise) will be successful or that it will employ such strategies with respect to all or any portion of its portfolio. The investment funds in which the Fund invests can be highly illiquid, are not required to provide periodic pricing or valuation to investors, and may involve complex tax strategies. In addition, the overall performance of the Fund is dependent not only on the investment performance of individual managers, but also on the ability of the Fund's Adviser to effectively select and allocate the Fund's assets among such managers on an ongoing basis. The Fund's portfolio may be highly leveraged and the volatility of the price of its interests may be great. The Fund's fees and expenses may substantially offset the Fund's trading profits. There is no secondary market for interests in the Fund and none is expected to develop. In addition, the ability to transfer one's interest in the Fund is restricted. It is possible that the Fund will be unable to provide tax information to investors without significant delays and investors may need to seek extensions on the time to file their tax returns at the federal, state and local levels. Interests are not deposits or obligations of, or guaranteed or endorsed by any bank or other insured depository institution, and are not insured by the Federal Deposit Insurance Corporation, Financial Service Compensation Scheme or other relevant non-U.S. governmental agency. Investors should consider the Fund as a supplement to an overall investment program and should invest only if they are willing to undertake the risks involved.

Endnotes

Statistics definitions

Volatility

Volatility is measured using the standard deviation. The standard deviation is a statistical measure of the degree to which an individual value in a probability distribution tends to vary from the mean of the distribution. The greater the degree of dispersion, the greater the risk.

Sharpe ratio

The Sharpe ratio measures the relationship of reward to risk in an investment strategy. It is generally interpreted that a higher ratio implies lower risk. The ratio is calculated as the average relevant annualized return less the risk free return divided by the standard deviation of the return. The risk-free return is calculated as the average annualized return of a relevant short-term interest rate product corresponding to the currency of the share class presented.

Sortino ratio

The Sortino ratio is a variation of the Sharpe ratio, which differentiates downside risk from general volatility to help measure the return relative to "harmful" volatility. The ratio is calculated as the relevant annualized return less the risk free rate divided by the loss deviation. The loss deviation focuses on negative values in a distribution and is calculated as the annualized standard deviation of negative returns.

Index definitions

AP PE Portfolio Gross: AP PE Portfolio Gross is equal to the composite private equity gross track record of Alternative Portfolio Ltd.

FTSE World BIG

The FTSE World Broad Investment-Grade Bond Index (WorldBIG) is a multi-asset, multi-currency benchmark, which provides a broad-based measure of the global fixed income markets. The inclusion of government, government-sponsored/supranational, collateralized, and corporate debt makes the WorldBIG a comprehensive representation of the global, investment-grade universe.

MSCI World (Total Return) Gross

A free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. As of June 2007 the MSCI World Index consisted of the following 23 developed market country indices: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States.

Performance fee definition

If the NAV of the AP Alternative Portfolio AG exceeds the High Water Mark including the applicable annualized Hurdle Rate of 5% at year-end, the Performance Fee is set at 15% on an annualized return of 5-10% p.a. and is set at 25% on an annualized return of 10-15% p.a. Overall, the total Performance Fee is capped at 2% of the NAV. For further details please refer to §18 of the investment guidelines.
